Military Service: Completed

Professional Summary

Biotechnology graduate specialized in Genetics with hands-on experience in molecular biology techniques, including PCR, DNA extraction, and gel electrophoresis. Experienced in laboratory operations, training, and quality control procedures. Demonstrated ability to manage lab activities and train students effectively. Seeking a role in Quality Control or laboratory-based positions within the pharmaceutical or biotechnology industry.

Career Objective

Seeking a position in Quality Control or laboratory operations within the pharmaceutical or biotechnology industry, where I can apply my molecular biology skills and laboratory experience while continuing to develop professionally.

Skills

Technical Skills:

• Molecular Biology Techniques (PCR, DNA Extraction, Gel Electrophoresis).

• Laboratory Instruments (ELISA, Spectrophotometer, Microscope).

• Laboratory Operations & Quality Control.

Computer Skills:

• Microsoft (Excel, Word, PowerPoint).

Work Experience

Laboratory Instructor & Trainer – Plasma Company (Mar 2023 - Jan 2025)

- Trained and mentored over 1,000 students in medical laboratory techniques, improving their practical performance and laboratory skills.
- Led and supervised medical laboratory training programs.
- Delivered practical training sessions in Hematology and Clinical Chemistry.
- Trained students on laboratory instruments including:
  - ELISA
  - Spectrophotometer
  - Microscope
- Monitored students' performance and evaluated practical skills.
- Assisted in curriculum development and course organization.

Laboratory Assistant / Lab Manager (Oct 2023 - Jan 2025)

- Supported laboratory operations, including sample reception, preparation, and data entry.
- Supervised sample processing and ensured adherence to quality standards.
- Trained junior staff and interns on laboratory procedures.
- Operated and maintained laboratory equipment.

Molecular Biology Assistant (Feb 2024 – Nov 2024)

- Performed DNA extraction from blood and other biological samples.
- Conducted PCR preparation and amplification techniques.
- Performed Gel Electrophoresis for DNA analysis.
- Assisted in laboratory workflow organization and sample handling.
- Followed biosafety and laboratory quality control procedures.

Education

Bachelor from faculty of agriculture , Banha University , Major Biotechnology (Genetics) (Sep 2020 – Jun 2024)

Certifications & Trainings

- ISO 22000:2018 Certification (Mar 8 – Mar 10 , 2022)
- IC3 Certification (Internet and Computing Core Certification) (Oct 2021)
- Genetic Transformation in Plants (Aug 22 – Aug 25 , 2021)
- Fundamentals of Working in Molecular Biology (Aug 15 – Aug 19 , 2021)

Projects

Extracting DNA

- Performed DNA extraction and gel electrophoresis analysis.

Plant Genetic Study

- Studied onion root mitosis using microscopic techniques.
